

**PRODUCT  
PERFORMANCE  
AND DATA SHEET**

**ACID CLEANERS**

**ALUMINUM CLEANER AND  
BRIGHTENER**

**4573**

**CONCENTRATED ACID**

**DESCRIPTION:**

**MOC<sup>®</sup>'s Aluminum Cleaner and Brightener #4573** is a highly dilutable clear liquid, acid cleaner. **It quickly and effectively removes oxidation, stains, rust and corrosion on aluminum (without a clearcoat and chrome).**

**Caution: contains high concentration of three acids, including hydrofluoric acid.**

**OUTSTANDING FEATURES:**

- **MOC<sup>®</sup>'s Aluminum Cleaner and Brightener** was designed to clean and brighten spokes, wire wheels, hubcaps, and any other bare aluminum or chrome surface which is subject to corrosion and oxidation.
- **It also does an excellent job when used to brighten truck trailers, building panels, buses and even cuts accumulated brake dust from rims.**
- To obtain maximum results, **follow all directions and cautions carefully.**

**APPLICATION:**

This is a strong product and may not be compatible with some surfaces. Test first in an inconspicuous area before use. Surface to be cleaned should be out of direct sunlight and cool to the touch. Dilute 1 part **Aluminum Cleaner and Brightener** with up to 10 parts of water. Mix this solution in a polyethylene, or plastic container since continued contact with metallic containers will cause corrosion. Brush, or spray the solution on the area to be cleaned, working from the bottom up. Allow it to react for 1-2 minutes, then rinse thoroughly. (Do not allow product to dry on surface.) For extreme cases, a stronger solution, or a second application, may be necessary.

**COMPETES WELL AGAINST:**

1. CAR BRITE: Mag-Alum Brightener
2. PRODUCTION: Foaming Aluminum Bright
3. ARDEX: Attack #6230
4. NEW AMERICAN: Wheel Brightener

**PACKAGING:**

45733 = 1 GAL  
45735 = 5 GAL  
45736 = 55 GAL
